

YOUR PARTNER IN GLOBAL COMMUNICATION

The STAR Group offers you complete management of your foreign language documents through a seamless process.

From the original document through translation to publication, an integrated, multiple language production process ensures a benchmark of efficiency and quality – all with an infrastructure that guarantees continual success.

Our goal: a STAR office in every country our customers export. That's how we better understand the communication needs of our customers and provide them with quality, market-specific services. The worldwide presence of the STAR Group is a decisive factor that plays an ever-increasing role in the customers' selection of a translation vendor.

Our services: Quality based on processes, linguistic and professional expertise. Your products are excellent and

well documented. They deserve an excellent translation. You have invested a large amount of time and money in your product documentation. The expenses involved in editing, publication and distribution have paid off. Your technical information is successful.

And the translations? Will they be just as successful? Don't leave that to chance.

A good translation ensures international success.

Factors, such as

- ▲ increased globalization
- ▲ importance of exporting
- ▲ more demanding time requirements
- ▲ increased information volume and complexity
- ▲ greater quality expectations
- ▲ legal regulations

have proven that translations can no longer be considered an after-thought. The simultaneous

management and maintenance of multiple languages is a complex process that can only be executed efficiently and with quality employing the appropriate processes, proven procedures and suitable tools.

STAR the single source partner for all your multilingual needs:

- ▲ Creation
- ▲ Translation
- ▲ Publication
